A girl in the steerage of the name of Grabholtz had her collar-bone broken. The Belgravia was sixteen days coming from Boulogne. She ran into westerly gales all through the passage. At times thick snow squalls made it im-possible for the lookouts to see the length of the ship.

Extremely cold weather was experienced, and the steerage passengers, all of whom were from Southern Europe, suffered severely. The ship encountered a hurricane yesterday which tossed her about like a chip on the ocean. Many of the passengers were bruised. It was in this storm that the passenger in the first cabin had his rib broken.

There were 103 cabin and 802 steerage passengers aboard.

The cabin passenger hurt is Ferdinand Haffener, of this city. He was tossed across the smoking room when a huge wave hit the ship. He left the pier in Hoboken to-day in a carriage.

The girl who broke her collar-bone in the steerage is Neilie Grabholtz. She went to St. Mary's Hospital. Several other passengers were bruised in the voyage. Extremely cold weather was experi-

the act of beating his mother by Policeman Hugh Enright, of the East Fifty-lirst street station, rammed the blue-coat through a window and was trying to force him into the street, four stories below, when Policemen Molnerney and Redele, of the East Sixty-seventh street station, interfered.

Enright was called to the house by Palma Posselle, who said she was a sister of Jose. She had run into the street soveaming and begged the policeman to save her mother from her brother. The girl said he was beating his parent. The policeman ran upstairs and found a young man standing over an old woman, who was cowering in a corner and weeping.

Size ordered Enright out of the room, and when the policeman refused to go he rushed at him, carrying the bluecoat off his feet.

Jose caught the officer by the throat, and for ten minutes they struggled until they reached the window through which Enright was pushed.

Fellow of the London Society of Science. just beginning to pile up when the the very highest medical and chemical the very highest medical and chemical authority, says of Munyon's Paw-Paw:

I have known this fruit (Paw-Paw) for many years, particularly in its own habitat. I have seen it make good the name of "The Vegetable Pepsin" time and time again. In the human body it accomplishes digestion. It concerns itself with the food from the instant it passes the typs. There is true digestion and true assimilation. It prevents and cures indigestion in all its phases. The blood made from food treated by Paw-Paw is a true vital fluid which refuses to contain the acids, the serms, the poisonous taints scientific. It presents to the medical profession Professor Munyon's preparation is scientific. It presents to the medical profession and to the sick and suffering the active principles of the fruit in the most eligible form. It cures Catarrh through a physiological action which removes all foul and unhealthy mucus of a catarrhal character. It renovates the mucous surfaces, drives out the catarrhal Doison wherever it finds lodgment, cleans house, as it were, and in so doing cures Catarrho or Gastritis, and restores healthful conditions.

Prof. Morse says much more, demon strating why it is that my Paw-Paw is a preventative of Rheumatism, of Kidney roubles and of Colds-because of the perfect action of every organ of the body which it induces. I know it will prevent them and any other disease due to functional sluggishness or weakness, and I know that

It will cure Dyspepsia. It will cure Nervousness. It will cure Sleeplessness.

It will cure Steepiessness.

It will cure Catarrh.
